

# ElliQ Health

A trusted **AI** companion expanded into proactive home health support.

Supporting older adults with daily engagement, reliable health insights, and routine reinforcement in the home.

# Expanding the Role of AI in the Home

ElliQ Health builds on deep trust and consistent daily engagement to deliver meaningful, conversational health support.

Through guided interactions, ElliQ encourages healthier routines and provides clinical teams with clearer visibility into well-being between visits.

---

## Proactive Health Support Through Conversation

ElliQ Health adds Integrated Home Health Support, a comprehensive layer that introduces guided health goals across insights, assessments, check-ins, adherence, and wellness. These goals may be set by clinicians, families, or the older adult, and ElliQ naturally integrates them into daily conversations.

This approach increases follow-through, supports early detection, and strengthens continuity of care.

# Agent Health Goals
